LECTRICAL **APPLIANCES**

A few years ago the use of electricity for cooking and heating was a novelty, and considered only as a curious and scientific experiment. Gradually, however, its practical value has been appreciated until today it has been put to innumerable uses in the home.

ABOR SAVERS the labor of the housewife. No matter for what purpose used, electricity has

lifted much of the burden from her shoulders, making her household duties a source of pleasure instead of drudgery. With electricity there is no wasted time, no wasted labor—the work is done quickly and, best of all, easily.

LECTRICAL FLAT IRONS

Ironing with the Electrical Flat Iron requires very little effort. No fire to stand over and attend to, and no weary tramping from froning board to the hot stove to change irons. The heat is centered in the iron itself, does not heat up the air around it as is the case with the old-fashloned iron. "Ironing Day" has no terrors for the housewife using the Electrical Flat Iron.

HAFING DISHES The Electrical Chafing Dish is ideal for preparing impromptu luncheons or aftertheater suppers. Innumerable delicacies can be prepared with a promptness and convenience that will appeal to every housewife. As no flame is used with the Electrical Chafing Dish, there is no smoke or dirt to guard against. Send for handy,

> WIN GLOWER LUMINOUS RADIATOR

For the early morning, when the room is still chilled, this radiator is a great convenience. A turn of the switch and in a few moments the room is comfortably warm. In the evening it takes the place of the old-fashioned fireplace, its radiant glow making the room bright and cheerful. A convenient, portable, safe radiator that can be used in any room of the house.

ADIANT TOASTERS Toast just right—the way you like it, because with the Electrical toaster the bread can be watched at all times. You can prepare your toast for breakfast right on the table and serve it crisp and warm the minute it is done. The attractive appearance of the Radiant Tonster makes it an ornament for any

MMERSION COILS By the usual method of boiling water.

with the heat applied from the outside. much heat is wasted, thereby consuming an unnecessary amount of fuel as well as an unnecessary amount of ruel as well as time. The Electrical Immersion Colls are immersed in the water, and all the heat is used. With them water can be brought to a boiling point in less than one-half the time taken by the old

OMBINATION GRILL The many uses to which the Radiant Electrical Combination Grill can be put makes it practically indispensable for the home. For toasting, broiling, frying or boiling, it is equally efficient. It is invalnable for the sick room or for every day use. May he operated in any room in the house possessing an electric light

NDISPENSABLE WATER HEATERS

The convenience of the Electrical The convenience of the Electrical Water Heater is unsurpassed. For the dressing room, bed room or any room possessing an electric lamp socket. A turn of the switch and in a few minutes you have boiling water. No longer necessary for you to carry your hot water from a distant part of the house.

EA KETTLES The Electrical Tea Kettle will be found a great convenience. It can be used on the table, and as there is no fiame from gas or stove to make soot, is is always clean. The contents can be kept at any temperature desired by reduced current after it has been brought to boiling point.

OU NEED THEM

These applianees are indispensable to every home. Electricity is convenient, economical and SAFE. The "electrical" household is the "happy" household. We
